

Commercial News – From the Far Right to the Left in Power and So the Highest Good Life in the Sense of Varoufakis then

By Shomit Sirohi

- I. In fact the process of an Economic Crisis and Far Right Dynamics – First the Seriousness from the Polls

In fact then seriousness begins with a description of the world in far right dynamics and even far right politics, and high crime rates, and even the deep wish for the left to win, which then wins and fails again and again which then is also in India the same problem I would say.

- II. The Humour and Celebration – Today the Left Has Won and that's about it with the High Life offered to all by Deterior Company which then is going on a high financial life and is swerving into the highest good life which is on in private ways for the Philosophers

So philosophers like Alain Badiou and Slavoj Zizek even Jacques Ranciere are busy with the Prophetic Sirohi and Israel is busy trying to meet them especially Wunderkid Sirohi – they are busy analysing the genius victory of the left – that they go compromise to the financial economics and follow the number as Badiou argues – the high life of the highest for them in fact secured and just the high life then.

- III. Health Debates – Are we talking about Utopian healthcare or the worst – Sirohi's Prophetic Jewishness

In fact then Health debates have gone from emergencies and aging and worse life to in fact the simple fact of Jewish life for Sirohi and Jewish people perhaps also Christian Pope and Reverends – which then is reverentially treated you see – they are happy with this – they know it is a symptom of finally just a process called rotting earlier to in fact fruity conversations today on the fruty nature of Hebrew Kabbalah to be followed – so lets just get that.
